

RVP

Radar Video Processor

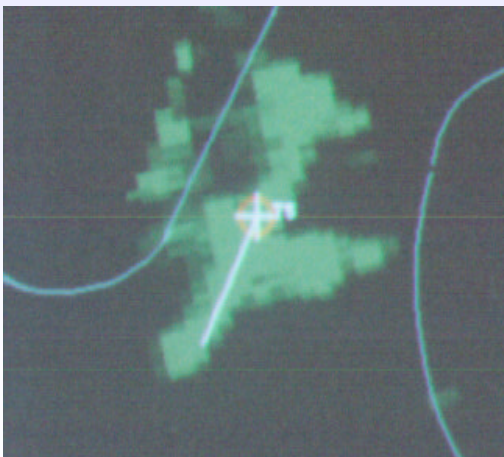

David G Johnson, Primagraphics

www.primagraphics.com

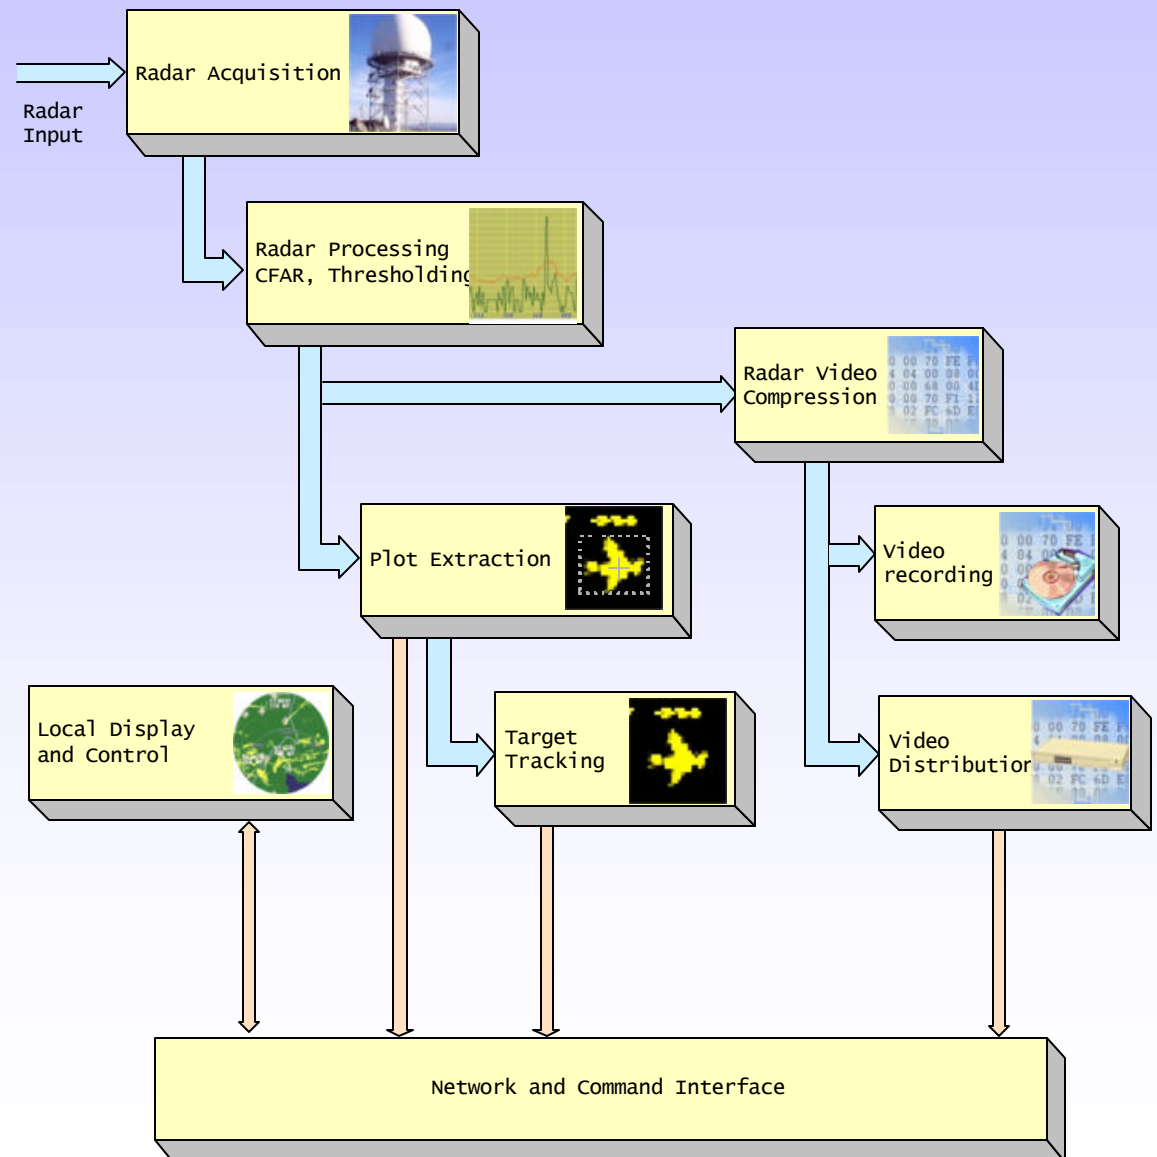

A High-performance
embedded radar video
processor for target tracking
and radar video distribution

Radar Tracking and Distribution

- The Problem
 - Acquisition, processing, tracking, distribution and recording of radar video
- The Solution
 - High-performance COTS hardware and software, providing scalability and flexibility.
 - Previous solutions have been based on proprietary hardware and were less flexible.

RVP Software Modules

RVP exists as a set of interacting software processes that run on standard COTS hardware.

Typical installations include Sparc/Solaris, Intel/Linux and Intel/Windows
