

Using Industry Standards to Exploit the Advantages and Resolve the Challenges of Multicore Technology

Markus Levy

The Multicore Association
and
The Embedded Microprocessor Benchmark Consortium

Abstract: Many system designers realize that multicore technology is happening here and now, but they are still working out whether the risks are worth the reward. This presentation highlights the benefits of multicore in general, and specifically in regards to COTS-based platforms, including the advantages of adopting COTS devices and software that will help facilitate multicore-enabled designs.
