

Applying Open Standards to FPGA IP Interfaces

Shepard Siegel

**11th Annual Workshop on
High Performance Embedded Computing
MIT Lincoln Laboratory
September 18-20, 2007**

- **Components must Travel**
 - Component-based design
 - Interface before Implementation
 - Nearly continuous evolution
- **Separation of Concerns**
 - Computation ↔ Communication
 - Specifier ↔ Implementer
 - Application ↔ Architecture ↔ Implementation
- **“The von Neumann Syndrome”** [Reiner Hartenstein 2007]
 - Changing algorithms
 - Changing resources

- **Well-Defined Interoperability**
- **Bias Toward the Application**
- **Clearly Defined Choices**
- **Composition**
 - Completeness
 - Composition
 - Linear-Effort

Thank you!
